

HOW WE CREATE VALUE

SAIBA follows an open-access model, therefore, anyone involved in the accounting and finance sector can become associated with the organisation. Members fall into various membership tiers, according to experience and qualifications. By joining our community of accounting professionals, members take the first step towards advancing their careers.

SAIBA offers members accessible and recognisable designations that deliver opportunity. More than 50% of our members are employed in business, the public sector or academia. The remainder manage their own accountancy practices within the private sector.

It is only by taking hands with our members that we can have a positive impact on the economy.
